

## Hold onto more of your cash.

**Real-Time Settlements by OBM** delivers unmatched data transparency and precision control, allowing power suppliers to implement flexible payment schedules while safeguarding against financial exposure. For miners, this means you no longer need to provide large amounts of collateral to work with a power supplier.

### Reduced Collateral Requirements

- ✓ Work with power suppliers without tying up large amounts of capital upfront
- ✓ Maintain operational flexibility with lower financial barriers to entry
- ✓ Access more power opportunities that were previously out of reach

### Flexible Payment Schedules

- ✓ Benefit from daily, weekly, or monthly settlement options
- ✓ Align payments with your mining revenue cycles
- ✓ Full visibility and control over all payment activities

### Transparent Operations

- ✓ Complete visibility over your payment activities and settlement status
- ✓ Real-time transaction monitoring and reporting
- ✓ Know exactly where you stand with every power supplier relationship

### Enterprise-Grade Security

- ✓ Your transactions protected by SOC 1 Type I, SOC 2 Type I certification
- ✓ Secure escrow management for all settlement activities
- ✓ Peace of mind with industry-leading security standards

Learn how OBM can help you get more power with less collateral.
