## Advanced Power Management

### Dynamic energy agility for your mining operation.

Advanced Power Management provides hands-free energy optimization for operations of any size and market—whether operating in regulated or deregulated markets.

TRUSTED BY  
**10,000+**  
Customers

Managing a mining operation is high stakes. Even small performance dips can result in significant cost increases. Maximize the value of your mining investment with Foreman's Advanced Power Management premium feature.

### PRICE RESPONSE PLUS

Maximize profitability at every price point in dynamic pricing markets. Let Foreman calculate model-specific strike prices in real-time or define your own. Three curtailment strategies allow you to apply the best strategy to each of your miners based on each miner's hardware and firmware.

- ✓ **Basic** – Delivers reliable on/off control when strike price thresholds are met to avoid high costs
- ✓ **Power Mode** – Adds discrete states to underclock or overclock your mines to generative savings or capitalize on lower energy costs
- ✓ **Wattage Target** – Enables granular, wattage-level precision to capture profit at price points that simpler strategies miss entirely

### ADAPTIVE DISPATCHES

Flexible, automatic curtailment options that deliver maximum profit per MW while protecting critical infrastructure.

- ✓ **Active Curtailment Monitoring** – Ensure that curtailed miners stay down for the duration of a dispatch
- ✓ **Set Point Dispatches** – Keep your power draw below your allowed target
- ✓ **Buffered Dispatches** – Maximize your use of behind-the-meter power generation (solar, wind, gas flare, etc.)
- ✓ **Recurring Schedules** – Schedule curtailments to perform when needed without all the stress
- ✓ **Execution Sequences** – Mine only your most profitable miners when you curtail part of your load

### PARTNER INTEGRATIONS

Capture additional revenue streams and reduce costs by integrating with your power partner to automate the execution of your power strategy with programs like Demand Response, Peak Avoidance, and more.

- ✓ **Third-Party Integration** – Out-of-the-box integrations with leading QSEs, CSPs, local utilities, and co-ops
- ✓ **Earn Revenue or Savings** – Get paid for curtailment in deregulated markets or secure lower energy rates in regulated areas. Foreman supports leading Demand Response, Peak Response and other programs
- ✓ **Automatic Participation** – Aggregators such as Voltus, CPower, and GridBeyond manage the process so you can stay focused on daily operations

## Adaptive cruise control for your mine.

Foreman is the industry-leading bitcoin mine management software, enabling miners to remotely manage their sites from anywhere. Foreman empowers mining operators with the automation, insights, and precision they need to optimize efficiency, maximize profitability, and reduce operational risk.

**Trusted by more than 10,000 customers,** Foreman enables miners to unlock energy agility, simplify operations, and grow with confidence.

### ESSENTIAL FEATURES

Included with all Foreman subscriptions

- ✓ **Real-Time Monitoring & Insights** – Track hash rates, miner status, and earnings in a customizable dashboard
- ✓ **Alerts & Triggers** – Detect issues in real-time and automate fixes to minimize downtime
- ✓ **Power Controls** – Manage energy usage to enhance performance and reduce operational costs
- ✓ **Bulk Miner Management** – Apply configuration changes across thousands of miners instantly

### PREMIUM FEATURES

Available as add-ons

- ✓ **Advanced Power Management** – Hands-free, automated energy management with price response, time-of-use scheduling, and demand response integration
- ✓ **Asset & Inventory Management** – Real-time visibility, proactive maintenance alerts, and integrated ticket management
- ✓ **Data & Reporting** – In-depth analytics, direct access to BigQuery datasets, and custom reporting tools
- ✓ **Security & Compliance** – Access SOC 1 and SOC 2 reports, Bridge Letters, and ISO 27001 certification through the Foreman Trust Center
- ✓ **Managed Network Services** – Custom solutions, expert audits, and hands-free setup & support

### ABOUT OBM

OBM is a leader in flexible load management solutions. We provide energy agility, operational simplicity and risk mitigation through our innovative compute management platform, comprehensive energy optimization technology, and broad energy partnerships. With a proven track record of managing loads over 500 MW and integrating them into leading demand response programs nationwide, as well as mitigating operational and financial risk, OBM is transforming the landscape of compute-intensive operations.
